

## Jirafo Loader - Unloader

The **Technosystem Jirafo** Loader / Unloader is the ideal Loader/ Unloader for small and medium sized PCB shops. It's the perfect **system to load or unload any horizontal line** where the panels need to be stored in semivertical position.

**Jirafo** has a unique trolley system where **all the trolleys are exactly the same** and are always at the same height. In many PCB shops you find horizontal lines at different heights and this requires Loaders and Unloaders to be adjusted at different heights too.

This is no longer a problem with the Jirafo Loader/ Unloader as the **unique adjustable conveyor system** offers the solution and solves the problem by means of a tilted conveyor.

The combination of the **Jirafo** tilted conveyor together with the trolleys at the same height makes the **Jirafo Loader / Unloader** and **excellent solution to transport PCBs** on trolleys from one department to another without the need of manual handling.

**The Jirafo** can be delivered as a Loading device, Unloading device or Buffer (Loader and Unloader in the same device). The **Jirafo Loader Heavy Duty** is the **ideal choice to load heavy drilled panels with holes** as it's equipped with extra vacuum power.

### CHARGE BY TROLLEY

	Length	Width	Thickness	Weight	Line speed range	
Max. Panel Size	630mm	530mm	3,2 mm	3 Kg	Panel / min	5
Min. Panel Size	460mm	305mm	0,2 mm	0,1 Kg	Max m / min	5
					Min m/min	0,5
